## Last Day of the AI Unit!

No computer needed. Show what you remember about your AI assistant, OpenClaw. Finish with a quick design challenge and a look back at everything you learned.

## Part 1 - Matching (30 points)

Write the letter of the correct definition next to each term.

- A. The always-on "brain" that keeps your assistant running.
- B. A service that gives you one key to reach many AI models.
- C. A secret code, like a password, that lets you use a model.
- D. When the assistant asks permission before it does an action.
- E. A timer that lets the assistant act on its own.
- F. An AI that can take real actions, not just chat.

## Part 2 - True or False (25 points)

Write T (true) or F (false) in each box.

OpenClaw runs on your own computer.

You should share your API key so friends can use it.

In 'ask' mode, the assistant runs commands without asking.

The gateway is the always-on brain of the assistant.

An assistant can remember you across restarts with memory files.

## Part 3 - Short Answer (30 points)

1. How is an AI assistant different from a simple chatbot?

2. Why should you keep your API key secret?

3. Why do we keep the heartbeat OFF and stop the gateway when class ends?

## Part 4 - Design Your Own Assistant (15 points)

**Invent an AI assistant and plan it out below.**

Assistant's name:

What job does it help with?

When should it STOP and ask your permission first?

## BONUS - Looking Back (+5 points)

### You finished the AI unit!

Look back at everything from this unit -- agents, the loop, tools, MCP, skills, memory, building your own tools, and running a real assistant.

**Write 3 things you learned in the AI unit:**
