SECTION 1: Prompt Battle — Vague vs. Detailed (30 points)

Your Mission

Generate the SAME image idea twice: once with a vague prompt and once with a detailed prompt. See how much better specific prompts work! Use ChatGPT (chat.openai.com), Gemini (gemini.google.com), or another tool.

AI tool used:

Round 1: VAGUE prompt (keep it short and generic)

Your vague prompt:

Describe what the AI generated (or paste a screenshot later):

Round 2: DETAILED prompt (subject, style, lighting, mood)

Your detailed prompt:

Describe what the AI generated:

Which image was better? Why? (2 sentences)

SECTION 2: Multimodal Challenge (30 points)

What is Multimodal?

Multimodal AI can understand BOTH text and images. You can upload a photo and ask it questions! Let's test this.

Task A: Upload any photo to ChatGPT or Gemini and ask a question.

(Use a photo from your camera roll, a screenshot, or find one online)

What photo did you upload?

What question did you ask?

What did the AI answer? Was it correct?

Task B: Test the AI's limits — upload something tricky!

(e.g., handwritten notes, a meme, a blurry photo, something in another language)

What tricky image did you use?

How did the AI do? Did it understand correctly or get confused?

Task C: What types of images do you think AI is BEST at understanding?

What types would be HARDEST? (2-3 sentences)

SECTION 3: Real vs. AI Detective (25 points)

Can You Spot the Fake?

AI-generated images are getting better every day. Your teacher will show you several images. For each one, decide: REAL or AI-GENERATED? Write your guess and explain your reasoning.

Image 1:

Real or AI?

Why do you think so?

Image 2:

Real or AI?

Why do you think so?

Image 3:

Real or AI?

Why do you think so?

Image 4:

Real or AI?

Why do you think so?

Image 5:

Real or AI?

Why do you think so?

What clues help you tell the difference? List at least 3:

SECTION 4: Ethics & Reflection (15 points)

Q1: Why is it dangerous to create fake images of real people?

Q2: A classmate finds a shocking news photo online. How should they verify if it's real or AI-generated? (name 2 steps)

Q3: Name one GOOD use and one BAD use of AI image generation.

BONUS: Creative Prompt Challenge (+10 points)

Write the most creative, detailed image prompt you can think of.

Include: subject, setting, art style, lighting, mood, and one surprising element.

Your masterpiece prompt:

What did the AI create? Rate it 1-5 and explain:
